#### THE UNIVERSITY OF GEORGIA

ATHENS 30602

OFFICE OF THE PRESIDENT

January 3, 1977

#### Dear Colleague:

The University of Georgia Fact Book was first published in 1970. Its purpose is to provide a ready source of basic factual information for use in answering common questions regarding the University, preparing grant proposals, developing long-range plans, replying to questionnaires, recruiting new faculty members and preparing speeches for various occasions.

Fact Book 1976 is being distributed to each faculty member of the University. We hope you will find it helpful and that it will enhance your understanding of the scope and progress of your University. Your comments and suggestions on this publication will be welcome.

Sincerely,

Fred C. Davison

Tred Davison

President

UNIVERSITY OF GEORGIA FACT BOOK 1976

# THE UNIVERSITY OF GEORGIA INSTITUTIONAL RESEARCH AND PLANNING 310 NEW COLLEGE (404) 542-8832

ATHENS, GEORGIA 30602

January 3, 1977

The *University of Georgia Fact Book* has become both an important and enjoyable project of the Office of Institutional Research and Planning. In fact, the *Fact Book* and Institutional Research and Planning have much in common: both are intended to provide useful and up-to-date information on the University and its programs.

We hope both the Fact Book and the Office of Institutional Research and Planning will serve the informational needs of the University community. We sincerely solicit comments and suggestions on the Fact Book to make it a better data reference, and we encourage those who have need for more detail or additional data needs to contact our office. Obviously the Fact Book cannot be a definitive work on the University, but if it can be more inclusive, or if we can provide specific detail as needed, we will do our best to honor the requests.

It is clear, from the data sources listed in the *Fact Book* that Institutional Research and Planning is indebted to many offices and people at the University for the information in the *Fact Book*. We'd like to thank those who have provided data for *Fact Book 1976* and relieve them from any error of format or presentation. A special word of appreciation needs to be given to Anne Coleman who composed the book and to the University Printing Department who produced the final copy.

Larry G. Jones, Associate Director Lois Lockyer, Technical Writer

GENERAL INFORMATION

#### UNIVERSITY OF GEORGIA PERSPECTIVE

Just after the close of the American Revolution, the Georgia legislature, made up of bold and far-seeing men, took a step that soon was to start another revolution — this one in the history of higher education.

In 1785 the legislature granted a charter to The University of Georgia — the nation's first state university charter, and the first public recognition that a state has a duty to provide for the higher education of its citizens.

The infant university had no campus, no money, no faculty, and — in fact — no students. For 16 years it existed on paper only, for it was not until 1801 that a site was selected for the campus and the first few students began to trickle into the newly-formed town of Athens, then at the edge of the frontier.

The faculty that first year consisted of one man, the college president. Classes, just as often as not, were conducted under the trees or in the president's house, while the University waited hopefully for its first building to be raised.

From such a small beginning the University has grown to more than 21,000 students. A new campus and 12 schools and colleges have been added to the original Franklin College, the nucleus of the University and now the Franklin College of Arts and Sciences. More than 200 major buildings have been added to the University plant; the campus, including forestry and agriculture areas, consists of some 32,000 acres. Off-campus centers and agricultural experiment stations take university services to all parts of the state.

But growth and time have not altered everything at Georgia. The tree-shaded campus is rich in tradition. Reminders of the University's early beginnings are Old College, the Arch at the campus entrance, the 140 year-old Chapel. The same Chapel bell that called students to classes more than a century ago is still the chief heralder of athletic victories of the "Bulldogs."

The long and interesting history of The University of Georgia cannot be summarized easily. For a more detailed history, E.M. Coulter's history, *College Life in the Old South; A Historical Sketch of the University of Georgia*, by A.L. Hull; and H.C. Tuck's *Four Years at the University of Georgia*, 1877-1881, are available in the Special Collections Room in the Ilah Dunlap Little Memorial Library.

While it is equally difficult to capsulize the dynamism of the modern day university in a quantitative summary such as this, it is hoped that FACT BOOK 1976 will capture in a statistical way much of the qualitative sense of growth, vitality and excellence that has become The University of Georgia.

#### **PURPOSE**

The University of Georgia is the State's oldest, most comprehensive, and diversified institution of education. As the capstone of the University System of Georgia, its influence permeates the entire structure and organization of education in the State of Georgia, and it serves practically all of the educational needs of the State's increasingly complex and technologically oriented society. A vital aspect of the University's role is that of leadership in creating a pace of achievement and a climate of intellectual and cultural development relative to all other units in the University System of Georgia and to all of the State as well.

Teaching is historically the oldest function and purpose of the University and continues to be its primary and most important purpose and responsibility. Through its various degree programs the University makes its greatest single contribution to the State and region. The teaching programs of the University seek to provide the broadest possible educational opportunities for the youth of the State and to prepare them for a variety of careers and professions.

The special strength of the University in meeting this responsibility lies in the scope and diversity of the programs it offers at all levels of higher education. On the undergraduate level the University offers 14 baccalaureate degree programs, with major concentrations available in approximately 190 different fields through the framework of 115 different academic departments. On the graduate level the University offers work toward 18 master's degrees in approximately 125 areas of concentration, and 3 doctoral degrees (Ph.D., Ed.D., D.P.A.) in approximately 73 areas of concentration. Professional degree programs are offered in the School of Law, the College of Veterinary Medicine, the School of Pharmacy, the School of Social Work, and the School of Forest Resources. In addition a variety of noncredit programs are offered through the Georgia Center for Continuing Education in cooperation with the 13 schools and colleges comprising the University.

An important responsibility of the University of Georgia is to provide special programs of excellence for the State's academically superior students. The State's most talented youth are among its most valuable resources, and it should not be necessary for them to leave the State of Georgia to seek opportunities for the fullest development of their talents.

As the capstone of the University System and of higher education in the State of Georgia, the University must continue to be the one major institution with a diverse and comprehensive program of graduate education. One of the most important academic developments at the University during the past decade has been its emergence as a major institution of graduate education with regional and national significance. The continuing vitality of the University's graduate educational programs depends upon a strong commitment to basic and applied research in all of the academic disciplines. In addition the University, through its research function, must seek to expand the frontiers of knowledge so as to provide the expertise and resources that are necessary to cope with the difficult and complex problems facing the State and to improve the quality of human life in the State.

In its public service function the University seeks to extend the teaching and educational function to the adults of the State of Georgia and to apply knowledge to the problems of society. The concept of higher education is no longer limited to students between the years of 18 and 25 seeking one of the traditional degrees. The University's many resources must be made available for the continuing education of adults and for the application of academic expertise to the resolution of societal problems.

#### **DIVISION OF STUDENT AFFAIRS**

The Division of Student Affairs believes student potential is enhanced through a systematic emphasis on individual needs within the educational environment, and seeks to implement this philosophy through services and programs which help students assess and utilize available academic resources; interact with and develop respect for others of similar and diverse backgrounds; plan and prepare for chosen life work; and maintain mental and physical health while integrating personal, professional, and social values.

Eight departments provide the student with services and programs in the following areas:

The Career Planning and Placement Office provides career planning and advisement, comprehensive placement services, information regarding professional and graduate schools, and assists students in locating employment while attending the University.

The Counseling and Testing Center provides counseling for students undecided about a major and/or career. When appropriate, psychological tests are administered, scored, and reviewed.

The Office of International Services and Programs provides counseling and advising services to assist foreign students, to promote international understanding, and to advise American students and faculty interested in work, study or travel abroad.

The Office of Judicial Programs provides legal advice for University student related policy, supervises the Student Judiciary System, and assists in the enforcement and formulation of University regulations.

The Department of Student Activities is responsible for providing programs, services, and facilities for the students to meet social, cultural, recreational, and intellectual needs.

The Student Financial Aid Office provides financial assistance to qualified students through loans, scholarships, work/study, and coordinates veteran benefits and affairs.

The University Health Service provides comprehensive physical and mental health services on an outpatient and inpatient basis. Special services include specialty clinics, pharmaceutical laboratory, x-ray and physical therapy services.

The Department of University Housing provides residence hall and family housing accommodations to students, as well as opportunities for residents to participate in social, educational, developmental, and recreational programs designed to further the students' personal, scholastic, and social development.

•		

RESEARCH, SERVICE, AND AUXILIARY UNITS

#### AGRICULTURAL EXPERIMENT STATIONS

The responsibility of the Agricultural Experiment Stations is to seek, and verify through scientific research, new knowledge concerning agricultural pursuits in the broadest sense of the word. Research projects are conducted in agricultural economics, agricultural engineering, agronomy, animal and dairy science, entomology, food science, forest resources, home economics, horticulture, plant pathology and genetics, and poultry science.

#### BUREAU OF EDUCATIONAL STUDIES AND FIELD SERVICES

The fundamental objective of the Bureau in accomplishing its service mission is to provide educational consultants as requested by the public schools of Georgia, the region, other colleges, and the State Department of Education. The services of the Bureau are available on a continuing basis to local school boards and other educational agencies for the analysis of problems, for the improvement of educational practices, and for continual updating of the knowledge and skills of administrative, supervisory, and teaching personnel.

#### **CAMPUS BUS SYSTEM**

A fleet of 19 buses provides campus transportation for students and staff. Seven routes are operated from 7:00 a.m. to 6:00 p.m., with a night route from 6:00 p.m. to 10:30 p.m. The campus bus system carried 5,165,032 passengers in fiscal year 1976.

#### CENTRAL DUPLICATING SERVICE

A completely equipped quick copy center for camera ready material is located in the basement of the Business Services Building for departments and units listed in the University or Student Chart of Accounts with pick-up and delivery and other services such as folding, drilling, copy reduction, and collating.

#### CENTRAL OFFICE SUPPLY

The University-operated warehouse and issuing facility for office supplies and related items provides supplies at cost to University departments or units listed in the University or Student Chart of Accounts. Catalogs are provided, and supplies are delivered from the Business Services Annex.

#### COOPERATIVE EXTENSION SERVICE

The Extension Service acts as an educational service arm for the University providing information and training to Georgia citizens. Staff members represent both the University and USDA and present educational programs in agriculture, home economics, community and rural development, 4-H, and youth development. Programs are based on research from Experiment Stations and coordinated at the local level by County Extension Chairmen in response to needs articulated by local Program Development Boards.

# THE DIVISIONS OF RESEARCH AND SERVICES: COLLEGE OF BUSINESS ADMINISTRATION

The Research Division serves to stimulate and promote research activities by the College of Business faculty, and to provide the faculty with support services such as mail surveys, outside funding information, grant preparation, editorial assistance, summer research grants, and other research aids. In addition, the Division conducts a program of State and regional economic analysis through the Center for Regional Studies and the Georgia Economic Forecasting Project. The Division of Services is charged with ascertaining the service needs of the public and developing programs to meet those needs through a planned visitation program by field representatives and close coordination with the faculty in program development.

#### THE GEORGIA CENTER FOR CONTINUING EDUCATION

The Center for Continuing Education is a higher education arm of the University through which educational programs are planned, organized, and implemented in response to identified and expressed diverse needs of adult Georgians, as manifested individually or through a multitude of organized groups, ranging from official government agencies to business organizations to civic, cultural, and educational groups. The Center serves as a contact point through which University faculty, clientele groups, and Center staff work in concert to bring to the adult publics the relevant resources of the University and the University System.

The Center fulfills this function through conducting conferences in Center facilities; University credit courses, held on and off campus, in the evenings and on Saturdays; non-credit courses, on and off campus; independent study or home study; and educational television broadcasts over WGTV. Other services provided by the Center include film production and other educational multi-media production, cooperative programming with other higher education institutions throughout the State, film library operations, and consultation and supportive services to organizations and agencies through the Center.

#### GEORGIA MUSEUM OF ART

The Georgia Museum of Art was founded in 1945 by Alfred H. Holbrook, and is dedicated to the concept of instructional service not only to the University but to the community as well. The permanent collection of the Museum now numbers over 4,000 works of art, with primary emphasis on American artists. Extensive files are maintained on each object for the benefit of the student. The Museum cooperates with various departments in scheduling exhibits of common interest.

#### THE GEORGIA REVIEW

The Georgia Review is a University quarterly, publishing essays, fiction, poetry, and book reviews on many subjects in a variety of styles and tones. It draws from a wide range of interests, including literature, history, philosophy, architecture, film, and the musical and visual arts. By discriminating the more permanent from the more ephemeral values, the Review, appeals both to specialists and to general readers everywhere.

#### THE INSTITUTE FOR BEHAVIORAL RESEARCH

The Institute for Behavioral Research is a multidisciplinary research organization. Its purpose is to encourage a pooling of the expertise of staff members and graduate students from such departments as sociology, psychology, political science, management, economics, and educational psychology in an attack on significant social and behavioral problems.

#### INSTITUTE OF COMMUNITY AND AREA DEVELOPMENT

Technical and planning activities of ICAD are directed to community, area development organizations, state agencies, or other public groups. ICAD is involved in consultations, studies or research projects, as well as conferences, forums, and panels throughout the State.

#### THE INSTITUTE OF CONTINUING LEGAL EDUCATION IN GEORGIA

The Institute of Continuing Legal Education in Georgia represents the combined efforts of The University of Georgia School of Law, the Law Schools of Emory and Mercer Universities and the State Bar of Georgia to provide a continuing legal education program for the Georgia lawyer. Through this continuing legal education program the Institute provides the lawyer an excellent opportunity to keep up with the developments in his profession, to increase his own expertise, and to benefit from the knowledge of experts in various fields.

#### INSTITUTE OF ECOLOGY

The Institute of Ecology supports and encourages multi-disciplinary research and service activities in ecology involving faculty and graduate students from a variety of departments, schools, and research sites. The organization operates the Savannah River Ecology Laboratory for the U.S. Energy Research and Development Administration at the Savannah River Plant, and supports research in marine and freshwater ecology, thermal ecology, radiation ecology, mineral cycling, tropical and temperate forests, old field dynamics, agroecosystems, granite outcrops, and swamps.

#### THE INSTITUTE OF GOVERNMENT

The Institute is responsible for an interdisciplinary program designed to improve the knowledge and skills of elected and appointed State and local public officials in Georgia. To accomplish its purposes, the Institute of Government conducts nearly 300 training programs and conferences each year, engages in an extensive publications and research program, and offers technical assistance to public officials.

#### INSTITUTE OF HIGHER EDUCATION

The Institute of Higher Education provides resources for the professional development of administrators, faculty members, and educational researchers. The Institute's staff members are concerned with curriculum development, program evaluation, institutional research, management support skills, and overall institutional effectiveness. The Faculty Development in Georgia Program provides the opportunity each year for a number of faculty members in Georgia colleges, public or private, to continue their graduate education at the University. Under cooperative arrangements with other agencies and institutions the Institute works with two-year and four-year colleges in the State and surrounding region.

#### THE INSTITUTE FOR NATURAL PRODUCTS RESEARCH

The Natural Products Laboratory was established in 1969 to promote research in the chemistry of naturally occurring substances of plant origin, and was reorganized by Board of Regents action in 1976 as an Institute for Natural Products Research. The purpose of the reorganization is to extend the scope of current research on alkaloids, terpenes, and synthetic methods to include a program of chemical research on plant species native to Georgia and the Southeastern region. This program will involve the isolation, characterization, and elucidation of chemical structure of new compounds of possible use as drugs for the treatment of human disease, with especial attention being given to the search for compounds active against various types of cancer. It is anticipated that some of the compounds isolated will possess significant potential in basic and applied medical research.

#### THE INSTITUTE OF NATURAL RESOURCES

The Institute conducts research and coordinates programs and activities pertaining to (1) the Marine Institute, the Skidaway Institute of Oceanography, the Marine Extension Service, and the Sea Grant program; (2) use and management of biological resources - fish, wildlife, forests; and (3) use and management of water and mineral resources. The Institute cooperates closely with other units of the University System and, upon request, acts in an advisory capacity to government and private organizations on matters relating to natural resources.

#### INSTRUCTIONAL RESOURCES CENTER

The Center was established to assist colleges, schools, departments, and individual faculty members in the utilization of modern media in instruction. The preparation of visuals for television, the preparation of slides, photographs, and duplicate slides, the duplication of audio tapes, and closed-circuit television production are a part of the resources available in the IRC.

#### MARINE EXTENSION SERVICE

The University of Georgia Marine Extension Service provides both the mechanics for transfer of information and the proficiency for solving problems related to the State's marine resources. Formally established in July 1971, the program now carries out research, advisory, and educational activities from three geographic vantage points - Athens, Brunswick, and Skidaway Island. From the Athens campus, socioeconomic and legal studies are carried out in the broad area of coastal zone management. In Brunswick, a staff of marine fisheries specialists helps commercial fishermen solve problems affecting operating efficiency, a food scientist and staff work closely with seafood processors; and a marine ecologist and staff offer help to industry and government agencies in applying estuarine ecology and marine science to marine resource management problems. At the Marine Resources Extension Center on Skidaway Island the staff of specialists in marine mineral resources, coastal hydrography, and marine science education carries out an educational program designed to serve all age levels.

#### MARINE INSTITUTE

The University of Georgia Marine Institute, located on Sapelo Island, has been a center for basic research since it was founded in 1953. Sapelo's virtual lack of disturbance by man's activities in the coastal zone makes the Island an excellent environment for studies of estuarine and shallow coastal water ecosystems.

#### OFFICE OF COMPUTING ACTIVITIES

The Office of Computing Activities has three major computer hardware systems installed and interconnected which service not only the University of Georgia but also the University System of Georgia Network. Four divisions operate within OCA: the Educational and Technical Support Services Division provides a constant interface with all on-campus and remote users in the University System; the Institutional Services Division provides for software development to meet the information needs of the University administration. The Computer Services Division is responsible for system programming, control and data entry, and the management, scheduling and operation of all computers and associated hardware in the OCA to meet the computing needs of the user communities; and the Information Services Division provides literature search services for the research and graduate student staff of the University.

# OFFICE OF DEVELOPMENT AND UNIVERSITY RELATIONS

The Vice President for Development and University Relations is responsible for the planning, coordination, and conduct of all programs involving alumni and friends of the University, including instituional public relations and fund raising. The Office of the Vice President embraces three functional units: The Office of Alumni Relations works with the Alumni Society and various school and college groups conducting year-round programs involving alumni and friends throughout the United States. The Development staff is concerned with all aspects of fund-raising for the University and works closely with the various schools and colleges, their alumni constituents and friends. The University of Georgia Foundation, an independent incorporated group created to assist the University, handles endowments and unrestricted funds received from alumni, friends, and corporate donors. The Office of Public Relations is concerned with the gathering and dissemination of information about the University to members of the University community as well as to the various publics of the institution. An Office of Administrative Services supports the work of all offices under the Vice President.

#### OFFICE OF GENERAL RESEARCH

All non-agricultural research proposals and contracts are reviewed by the Office of General Research. The Office of General Research has the responsibility of overseeing budgets, expenditure accounting, and procedures for several State funded units and for contracts and grants administered through the office. It also provides help in locating sources of funds and in developing faculty members' research programs.

#### OFFICE OF INSTITUTIONAL RESEARCH AND PLANNING

The Office of Institutional Research and Planning has as a primary responsibility the collection, organization, and analysis of data to serve all aspects of the operation and management of the University. Student, faculty, staff and space utilizational analyses, and studies related to these areas, are performed, as well as studies related to projected needs, program objectives, and efficiency and effectiveness in use of institutional resources.

#### POULTRY DISEASE RESEARCH CENTER

The Poultry Disease Research Center carries out basic and applied research programs in many of the diseases of domestic poultry which are of economic importance to the poultry industry of Georgia. Diagnostic, laboratory, and consultative services are provided to individuals and groups in all phases of poultry production.

#### PUBLIC SAFETY DIVISION

Responses to problems of life safety and property safety by the Public Safety Division of the University are twofold. The operational response includes: full peace officer authority, service, and assistance by the University of Georgia Police Department; specialized attention to radiation safety, laboratory safety, accident prevention, fire prevention, and environmental safety in accordance with guidelines established by the State and federal governments by the Safety Services Department; and vehicle registration and parking control by the Traffic Safety Department. The professional response provides professionally trained, academically involved student members of the University community. Upon leaving the University these members provide knowledge and stimulation for improvement in the areas of law enforcement and environmental safety concerns to their communities. The Northeast Georgia Police Academy provides basic recruit training, specialized training, and in-service training to State, municipal, and county law enforcement officers in the Northeast Georgia area. The Safety Services Department conducts training classes relating to safety for faculty, staff, students, and the surrounding community.

#### RESEARCH SHOPS AND FACILITIES

The Vice President for Research, through the Office of General Research, administers the following shops and service facilities which are available to the University:

Central Research Stores Electronics Shop Glassblowing Shop Instrument Shop Cartographic Lab Geochronology Laboratory

#### RURAL DEVELOPMENT CENTER

The Rural Development Center, located at Tifton, is an educational and public service unit of the Cooperative Extension Service of The University of Georgia College of Agriculture. The program of the Center is directed toward the realization of four principal objectives: the improvement of agricultural and forest production efficiency; the development of advanced marketing techniques and expanded utilization of farm and forest commodities; the realization of comprehensive community development; and the continuation of manpower training and development.

#### UNIVERSITY BOOKSTORE

The University Bookstore, a retail facility specializing in textbooks, paperback books, educational supplies, art supplies, sundries, and UGA monogrammed novelties, is located in a modern facility at the corner of Sanford Drive and Baxter Street Extension.

#### UNIVERSITY FOOD SERVICES

The primary concern of University Food Services is the satisfaction of the needs and desires of the students, The selection of food, the type of services, and the hours of service are all geared to what is felt will satisfy the majority. Particular care is taken to ensure service of attractive wholesome food in generous servings at the lowest possible price.

Three dining facilities, Bolton Hall, Snelling Hall, and the Bulldog Room in the Union, are maintained by the University Food Services for students, faculty, and staff. In addition, the McWhorter Dining Hall serves the varsity athletes. The University Food Services also provides banquet services and catering for University groups.

#### THE UNIVERSITY OF GEORGIA BOTANICAL GARDEN

The Botanical Garden serves the University as an outdoor laboratory for regular and special classes of plant oriented disciplines at the University, as well as for certain types of research. Several research projects have been completed and others are underway. Research and instructional activities permitted in the Garden are determined under guidelines decided by the Botanical Garden Board of Advisors.

#### UNIVERSITY OF GEORGIA GOLF COURSE

A teaching and recreational facility available to students, faculty, staff, alumni and their dependents, plus conferees, the University of Georgia Golf Course is located on Milledge Avenue Extension. The 18 hole championship course, designed by Robert Trent Jones, also includes driving range, putting greens and chipping green, with "golfing weather" hours Monday through Friday from 8:30 a.m. until sundown, and weekends and holidays from 7:30 a.m. until sundown. The Pro Shop carries a complete line of golfing equipment and supplies.

#### UNIVERSITY OF GEORGIA LIBRARIES

The University of Georgia Libraries include the Main (Ilah Dunlap Little) Memorial Library, the Science (South Branch) Library, the Law Library, the Georgia Center Library, and various lab collections on the UGA campus, with experiment station libraries in Griffin, Tifton, and Skidaway.

The functions of a research library include supporting undergraduate instruction, graduate instruction, professional schools, and faculty research. The usefulness of a research library's collections extends to other educational institutions, and into the practical everyday affairs of commerce, industry, and government across the entire State or region.

#### UNIVERSITY OF GEORGIA PRESS

The University of Georgia Press was organized in the summer of 1938 with the stated purpose of publishing scholarly books and monographs. Its primary function is to publish the results of research and scholarship for the benefit of scholars and students and to publish readable and authentic interpretations of such material for the educated layman. The Press also publishes works which interpret and preserve the history and culture of the State and region.

#### THE UNIVERSITY OF GEORGIA RESEARCH PARK

The University of Georgia Research Park is being developed as a center of research and development, service, educational and training facilities for University, State, and federal, and private organizations which relate to the teaching, research, and service programs being conducted on campus. The activities of facilities located in the Research Park are related to applied studies in animal and plant pathology, agricultural engineering, bacteriology, botany, entomology, chemistry, pharmacy, physics, psychology, geology, food science, poultry science, forest management, work utilization, water pollution, zoology, ecology, community and area development, research into performance and function of the mentally retarded together with preparation of personnel to work with them, and other areas.

#### UNIVERSITY PRINTING DEPARTMENT

Quality printing services are provided to departments or units listed in the University or Student Chart of Accounts by the University Printing Department. The printing plant, equipped for type-setting, off-set printing, letter-press printing, and binding, is presently located in the basement area of Terrell Hall, pending the completion in 1977 of a new building for the printing and related departments.

#### VETERINARY MEDICAL EXPERIMENT STATION

The Veterinary Medical Experiment Station functions in coordinating research on the fundamental aspects of comparative medicine and the clinical sciences. The educational mission of the Station is, therefore, oriented toward the strengthening of the graduate programs in the biomedical sciences. The service function is manifest in the consultative roles of its members in comparative and laboratory animal medicine programs of the University System agencies and organization. The research and service functions are extended to the animal industry of Georgia.
