OFFICE OF THE PRESIDENT

January 20, 1978

Dear Colleague:

This publication of the annual *University of Georgia Fact Book* has been designed to provide a ready source of information to answer frequently asked questions about the University. The variety of topics addressed in descriptive terms should prove useful in responding to questionnaires, preparing grant proposals, and acquainting prospective faculty with the University.

Fact Book 1977 is being distributed to faculty and friends of the University. We hope you will find the publication informative and useful, and that the information has been presented in a manner that will enhance your understanding of the University.

Your comments and suggestions for future *Fact Book* publications will be welcome.

Sincerely,

A handwritten signature in cursive script that reads "Fred Davison". The signature is written in dark ink and is positioned above the printed name and title.

Fred C. Davison
President

PREFACE AND ACKNOWLEDGEMENTS

The *University of Georgia Fact Book* has become both an important and enjoyable project of the Office of Institutional Research and Planning. In fact, the *Fact Book* and Institutional Research and Planning have much in common: both are intended to provide useful and up-to-date information on the University and its programs.

We hope both the *Fact Book* and the Office of Institutional Research and Planning will serve the informational needs of the University community. We sincerely solicit comments and suggestions on the *Fact Book* to make it a better data reference, and we encourage those who have need for more detail or additional data needs to contact our office. Obviously the *Fact Book* cannot be a definitive work on the University, but if it can be more inclusive, or if we can provide specific detail as needed, we will do our best to honor the requests.

It is clear, from the data sources listed in the *Fact Book*, that Institutional Research and Planning is indebted to many offices and people at the University for the information in the *Fact Book*. We'd like to thank those who have provided data for *Fact Book 1977* and relieve them of any error in format or presentation. A special word of appreciation needs to be given to Theodora Schultz who composed the book and to the University Printing Department who produced the final copy.

Institutional Research and Planning

Larry G. Jones, Associate Director

Lois Lockyer, Institutional Research Analyst

January 1978

GENERAL INFORMATION

UNIVERSITY OF GEORGIA PERSPECTIVE

Just after the close of the American Revolution, the Georgia legislature, made up of bold and far-seeing men, took a step that soon was to start another revolution – this one in the history of higher education.

In 1785 the legislature granted a charter to The University of Georgia – the nation's first state university charter, and the first public recognition that a state has a duty to provide for the higher education of its citizens.

The infant university had no campus, no money, no faculty, and – in fact – no students. For 16 years it existed on paper only, for it was not until 1801 that a site was selected for the campus and the first few students began to trickle into the newly-formed town of Athens, then at the edge of the frontier.

The faculty that first year consisted of one man, Josiah Meigs, the college president. Classes, just as often as not, were conducted under the trees or in the president's house, while the University waited hopefully for its first building to be raised.

From such a small beginning the University has grown to more than 21,000 students. A new campus and 12 schools and colleges have been added to the original Franklin College, the nucleus of the University and now the Franklin College of Arts and Sciences. More than 200 major buildings have been added to the University plant; the campus, including forestry and agriculture areas, consists of some 32,100 acres. Off-campus centers and agricultural experiment stations take university services to all parts of the state.

But growth and time have not altered everything at Georgia. The tree-shaded campus is rich in tradition. Reminders of the University's early beginnings are Old College, the Arch at the campus entrance, the 140 year-old Chapel. The same Chapel bell that called students to classes more than a century ago is still the chief herald of athletic victories of the "Bulldogs."

The long and interesting history of The University of Georgia cannot be summarized easily. For a more detailed history, E.M. Coulter's history, *College Life in the Old South; A Historical Sketch of the University of Georgia*, by A.L. Hull; and H.C. Tuck's *Four Years at the University of Georgia, 1877-1881*, are available in the Special Collections Room in the Ilah Dunlap Little Memorial Library.

While it is equally difficult to capsulize the dynamics of the modern-day university in a quantitative summary such as this, it is hoped that *Fact Book 1977* has captured in a statistical way the qualitative growth, vitality, and excellence characteristic of The University of Georgia.

PURPOSE

The University of Georgia is the State's oldest, most comprehensive, and diversified institution of education. As the capstone of the University System of Georgia, its influence permeates the entire structure and organization of education in the State of Georgia, and it serves practically all of the educational needs of the State's increasingly complex and technologically oriented society. A vital aspect of the University's role is that of leadership in creating a pace of achievement and a climate of intellectual and cultural development relative to all other units in the University System of Georgia and to all of the State as well.

Teaching is historically the oldest function and purpose of the University and continues to be its primary and most important purpose and responsibility. Through its various degree programs the University makes its greatest single contribution to the State and region. The teaching programs of the University seek to provide the broadest possible educational opportunities for the youth of the State and to prepare them for a variety of careers and professions.

The special strength of the University in meeting this responsibility lies in the scope and diversity of the programs it offers at all levels of higher education. On the undergraduate level the University offers 14 baccalaureate degree programs, with major concentrations available in approximately 190 different fields through the framework of 115 different academic departments. On the graduate level the University offers work toward 18 master's degrees in approximately 125 areas of concentration, and 3 doctoral degrees (Ph.D., Ed.D., D.P.A.) in approximately 73 areas of concentration. Professional degree programs are offered in the School of Law, the College of Veterinary Medicine, the School of Pharmacy, the School of Social Work, and the School of Forest Resources. In addition a variety of credit and noncredit programs are offered through the Georgia Center for Continuing Education in cooperation with the 13 schools and colleges comprising the University.

An important responsibility of The University of Georgia is to provide special programs of excellence for the State's academically superior students. The State's most talented youth are among its most valuable resources, and it is not necessary for them to leave the State of Georgia to seek opportunities for the fullest development of their talents.

As the capstone of the University System and of higher education in the State of Georgia, the University must continue to be the one major institution with a diverse and comprehensive program of graduate education. One of the most important academic developments at the University during the past decade has been its emergence as a major institution of graduate education with regional and national significance. The continuing vitality of the University's graduate educational programs depends upon a strong commitment to basic and applied research in all of the academic disciplines. In addition the University, through its research function, must seek to expand the frontiers of knowledge to provide the expertise and resources that are necessary to cope with the difficult and complex problems facing the State and to improve the quality of human life in the State.

In its public service function the University seeks to extend the teaching and educational function to the adults of the State of Georgia and to apply knowledge to the problems of society. The concept of higher education is no longer limited to students between the years of 18 and 25 seeking one of the traditional degrees. The University's many resources must be made available for the continuing education of adults and for the application of academic expertise to the resolution of societal problems.

INSTITUTIONAL AND PROFESSIONAL ACCREDITATION

Institutional Accreditation

Southern Association of Colleges and Schools, Commission on Colleges

STUDENT RELATED INFORMATION

DIVISION OF STUDENT AFFAIRS

The Division of Student Affairs believes student potential is enhanced through a systematic emphasis on individual needs within the educational environment, and seeks to implement this philosophy through services and programs which help students assess and utilize available academic resources; interact with and develop respect for others of similar and diverse backgrounds; plan and prepare for chosen life work; and maintain mental and physical health while integrating personal, professional, and social values.

Eight departments in the Division of Student Affairs function to implement these objectives:

The Career Planning and Placement Office assists students both before and after graduation in exploring career options and in formulating and pursuing career goals. In addition, this department assists students seeking employment while attending the University, supplies information regarding professional and graduate schools, and provides comprehensive placement services.

The Counseling and Testing Center provides direction for students undecided about a major or career. Professional counselors help students define their abilities and aptitudes through personality and interest tests, a career library, audio-slide presentations, and taped interviews describing various majors offered by the University.

The Office of International Services and Programs provides both to foreign and American students services that promote international understanding. In addition to advising foreign students on personal problems, immigration matters, finances, and housing, this office also advises American students and faculty who are interested in work, study, or travel abroad.

The Office of Judicial Programs provides students with advice and assistance in legal matters relating to the University and assists in the formulation and enforcement of University policy. It further supervises the Student Judiciary System and the Defender Advocate Society, conducts legal research, and consults with individuals regarding alleged violations of University rules.

The Department of Student Activities coordinates various programs and facilities that contribute to the student's social, cultural, recreational, and intellectual development. Its responsibilities include Communiversity, Minority Student Programs, Fraternity and Sorority Affairs, the University Union, publishing a quarterly activities calendar, processing the I.D. photo card, printing and distributing the Student/Faculty Directory, and maintaining an Information Center in Memorial Hall.

The Student Financial Aid Office administers the University's financial aid programs and provides financial counseling and assistance in the form of loans, scholarships, and work/study opportunities to qualified students. This office also advises veterans and processes applications for veteran's benefits.

The University Health Service maintains a professional staff of physicians, nurses, counselors, and technicians who can provide students with comprehensive physical and mental health services on an outpatient and inpatient basis. The University Health Service includes specialty clinics, a pharmacy, laboratory, x-ray, and physical therapy, as well as a voluntary accident/sickness insurance policy.

The Department of University Housing provides residence hall and family housing accommodations for students and also serves as a liaison between the University and the fraternity and sorority corporations with houses on University property. In addition, the department sponsors a variety of recreational and educational programs and maintains a student and professional staff whose goal is to further the student's personal, social, and scholastic development.

**RESEARCH, SERVICE, AND
AUXILIARY AND ADMINISTRATIVE UNITS**

AGRICULTURAL EXPERIMENT STATIONS

The responsibility of the Agricultural Experiment Stations is to seek, and verify through scientific research, new knowledge concerning agricultural pursuits in the broadest sense of the word. Research projects are conducted in agricultural economics, agricultural engineering, agronomy, animal and dairy science, entomology, food science, forest resources, home economics, horticulture, plant pathology and genetics, and poultry science.

AUXILIARY AND ADMINISTRATIVE SERVICES

The University Bookstore, Campus Transit System, Food Services, University Golf Course, Printing Department, and the ROTC Uniform Store are Auxiliary Services supported by income generated from the sale of merchandise and services to students, faculty, and staff. Financially self-supporting, these units are related to the educational objectives of the University. Campus Mail, Central Duplicating, and Records Management are Administrative Service units which provide services to University Departments.

University Bookstore. The University Bookstore, a retail facility specializing in textbooks, paperback books, educational supplies, art supplies, and UGA monogrammed novelties, is located at the corner of Sanford Drive and Baxter Street Extension.

University Food Services. The objective of University Food Services is to satisfy the food service needs of students, faculty, and staff through the efficient service of a wide variety of wholesome foods served at reasonable prices in a pleasant atmosphere.

Three dining facilities, Bolton Hall, Snelling Hall, and the Bulldog Room, are maintained by the University Food Services for its customers. In addition, the McWhorter Dining Hall serves participants in athletic programs. The University Food Services also provides banquet services and catering for University groups.

University Printing Department. Quality printing services are provided to departments or units listed in the University or Student Chart of Accounts by the University Printing Department. The printing plant, located in its new facility on Green Street, offers type setting, offset printing, letterpress printing, binding, and a full range of related services.

University of Georgia Golf Course. A teaching and recreational facility available to students, faculty, staff, alumni and their dependents, plus conferees, the University of Georgia Golf Course is located on Milledge Avenue Extension. The 18 hole championship course, designed by Robert Trent Jones, also includes driving range, putting greens and chipping green, with "golfing weather" hours Monday through Friday from 8:30 a.m. until sundown, and weekends and holidays from 7:30 a.m. until sundown. The Pro Shop carries a complete line of golfing equipment and supplies.

Central Duplicating. Two completely equipped quick copy centers for camera-ready material provide pickup and delivery service and other services such as folding, binding, drilling, copy reduction, and collating. The centers are located in the basement of the Business Services Building and at the University Printing Department on Green Street. Services are available for departments and units listed in the University or Student Chart of Accounts.

Campus Transit System. A fleet of 19 buses provides campus transportation for students and staff. Seven routes are operated from 7:00 a.m. to 6:00 p.m., with a night route from 6:00 p.m. to 10:30 p.m. The Campus Transit System carried over 5.2 million persons in fiscal year 1976-77.

BUREAU OF EDUCATIONAL STUDIES AND FIELD SERVICES

The fundamental objective of the Bureau in accomplishing its service mission is to provide educational consultants as requested by the public schools of Georgia, the region, other colleges, and the State Department of Education. The services of the Bureau are available on a continuing basis to local school boards and other educational agencies for the analysis of problems, for the improvement of educational practices, and for continual updating of the knowledge and skills of administrative, supervisory, and teaching personnel.

CAMPUS PLANNING

The Office of Campus Planning assists the University administration in planning the physical development of The University of Georgia and its related agencies. Campus Planning serves as liaison agent between the University and the Board of Regents Office of Buildings and Grounds, as well as planning, coordinating, and implementing construction projects and related works.

CENTER FOR APPLIED MATHEMATICS

The University of Georgia Center for Applied Mathematics is devoted to research in frontier problems of applied mathematics.

Modern applied mathematics plays a key role in our society influencing strongly the development of the physical and biological sciences, economics, psychology, and engineering, and providing solutions and approaches through analytical and computer methods to diverse problems from national defense to the study of cancer.

COOPERATIVE EXTENSION SERVICE

The Extension Service acts as an educational service arm for the University, providing information and training to Georgia citizens. Staff members represent both the University and the U. S. Department of Agriculture and present educational programs in agriculture, home economics, community and rural development, 4-H, and youth development. Programs are based on research from Experiment Stations and coordinated at the local level by County Extension Chairmen in response to needs articulated by local citizens.

The Rural Development Center, located at Tifton, is an educational and public service unit of the Cooperative Extension Service of The University of Georgia College of Agriculture. The program of the Center is directed toward the realization of four principal objectives: the improvement of agricultural and forest production efficiency; the development of advanced marketing techniques and expanded utilization of farm and forest commodities; the realization of comprehensive community development; and the continuation of manpower training and development.

THE DIVISIONS OF RESEARCH AND SERVICES: COLLEGE OF BUSINESS ADMINISTRATION

The Research Division serves to stimulate and promote research activities by the College of Business faculty, and to provide the faculty with support services such as mail surveys, outside funding information, grant preparation, editorial assistance, summer research grants, and other research aids. In addition, the Division conducts a program of State and regional economic analysis through the Center for Regional Studies and the Georgia Economic Forecasting Project. The Division of Services is charged with ascertaining the service needs of the public and developing programs to meet those needs through a planned visitation program by field representatives and close coordination with the faculty in program development.

THE GEORGIA CENTER FOR CONTINUING EDUCATION

The Center for Continuing Education is a higher education arm of the University through which educational programs are planned, organized, and implemented in response to identified and expressed diverse needs of adult Georgians, as manifested individually or through a multitude of organized groups, ranging from official government agencies to business organizations to civic, cultural, and educational groups. The Center serves as a contact point through which University faculty, clientele groups, and Center staff work in concert to bring to adult publics the relevant resources of the University and the University System.

The Center fulfills this function through conducting conferences in Center facilities; University credit courses, held on and off campus, in the evenings and on Saturdays; non-credit courses, on and off campus; independent study or home study; and educational television broadcasts over WGTV. Other services provided by the Center include film production and other educational multi-media production, cooperative programming with other higher education institutions throughout the State, film library operations, and consultation and supportive services to organizations and agencies through the Center.

GEORGIA MUSEUM OF ART

The Georgia Museum of Art was founded in 1945 by Alfred H. Holbrook, and is dedicated to the concept of instructional service not only to the University but to the community as well. The permanent collection of the Museum now numbers over 4,000 works of art, with primary emphasis on American artists. Extensive files are maintained on each object for the benefit of the student. The Museum cooperates with various departments in scheduling exhibits of common interest.

GEORGIA REVIEW

The Georgia Review is a nationally known journal of arts and letters, published by the University since 1947. Its quarterly issues feature a rich blend of the best in contemporary thought and literature--essays, poetry, fiction, and book reviews. Intended for the informed, non-specialist reader, the *Review* appeals across disciplinary lines by drawing from a wide range of interests: literature, history, philosophy, architecture, film, and the musical and visual arts.

THE INSTITUTE FOR BEHAVIORAL RESEARCH

The Institute for Behavioral Research is a multidisciplinary research organization. Its purpose is to encourage a pooling of the expertise of staff members and graduate students from such departments as sociology, psychology, political science, management, economics, and educational psychology in an attack on significant social and behavioral problems.

THE INSTITUTE FOR NATURAL PRODUCTS RESEARCH

The Natural Products Laboratory was established in 1969 to promote research in the chemistry of naturally occurring substances of plant origin, and was reorganized by Board of Regents action in 1976 as an Institute for Natural Products Research. The purpose of the reorganization is to extend the scope of current research on alkaloids, terpenes, and synthetic methods to include a program of chemical research on plant species native to Georgia and the Southeastern region. This program will involve the isolation, characterization, and elucidation of chemical structure of new compounds of possible use as drugs for the treatment of human disease, with especial attention being given to the search for compounds active against various types of cancer. It is anticipated that some of the compounds isolated will possess significant potential in basic and applied medical research.

INSTITUTE OF COMMUNITY AND AREA DEVELOPMENT

Technical and planning services of ICAD are directed to community, area development organizations, state agencies, or other public groups. ICAD is involved in consultations, studies or research projects, as well as conferences, forums, and panels throughout the State.

THE INSTITUTE OF CONTINUING LEGAL EDUCATION IN GEORGIA

The Institute of Continuing Legal Education in Georgia represents the combined efforts of The University of Georgia School of Law, the Law Schools of Emory and Mercer Universities and the State Bar of Georgia to provide a continuing legal education program for the Georgia lawyer. Through this continuing legal education program the Institute provides the lawyer an excellent opportunity to keep up with the developments in his profession, to increase his own expertise, and to benefit from the knowledge of experts in various fields.

THE INSTITUTE OF ECOLOGY

The Institute of Ecology supports and encourages multi-disciplinary research and service activities in ecology involving faculty and graduate students from a variety of departments, schools, and research sites. The organization operates the Savannah River Ecology Laboratory for the U.S. Energy Research and Development Administration at the Savannah River Plant, and supports research in marine and freshwater ecology, thermal ecology, radiation ecology, mineral cycling, tropical and temperate forests, old field dynamics, agroecosystems, granite outcrops, and swamps.

THE INSTITUTE OF GOVERNMENT

The Institute is responsible for an interdisciplinary program designed to improve the knowledge and skills of elected and appointed State and local public officials in Georgia. To accomplish its purposes, the Institute of Government conducts nearly 300 training programs and conferences each year, engages in an extensive publications and research program, and offers technical assistance to public officials.

INSTITUTE OF HIGHER EDUCATION

The Institute of Higher Education provides resources for the professional development of administrators, faculty members, and educational researchers. The Institute's staff members are concerned with curriculum development, program evaluation, institutional research, management support skills, and overall institutional effectiveness. The Faculty Development in Georgia Program provides the opportunity each year for a number of faculty members in Georgia colleges, public or private, to continue their graduate education at the University. Under cooperative arrangements with other agencies and institutions, the Institute works with two-year and four-year colleges in the State and surrounding region.

THE INSTITUTE OF NATURAL RESOURCES

The Institute is an interdisciplinary unit designed to synthesize relevant aspects of the biological, physical, and social sciences, as well as law and humanities, to solve complex natural resource management problems. The Institute conducts research and coordinates University programs and activities, pertaining to (1) the use and management of biological resources — fish, wildlife, forests; (2) use and management of water and mineral resources; (3) land and related resource planning and management; and (4) natural resource policy analysis. The Institute cooperates closely with other units of the University System, and, upon request, acts in an advisory capacity to government and private organizations on matters relating to natural resources.

OFFICE OF INSTITUTIONAL RESEARCH AND PLANNING

The Office of Institutional Research and Planning has as a primary responsibility the collection, organization, and analysis of data to serve all aspects of the operation and management of the University. Student, faculty, staff and space utilization analyses, and studies related to these areas, are performed, as well as studies related to projected needs, program objectives, and efficiency and effectiveness in use of institutional resources.

INSTRUCTIONAL RESOURCES CENTER

The Instructional Resources Center was established to assist colleges, schools, departments, and individual faculty members in the utilization of modern media in instruction. The IRC operates a film and tape library available to faculty for on-campus use. The preparation of visuals for television; color xerography; the preparation of slides, photographs, and duplicate slides; the duplication of audio tapes; and closed circuit television production are a part of the resources available in the IRC.

MARINE SCIENCES PROGRAM

The University of Georgia consolidated three existing units in 1977 -- the Marine Institute, the Marine Extension Service, and the Georgia Sea Grant Program -- into the Marine Sciences Program to improve the coordination of marine research and marine advisory services. To strengthen teaching in marine sciences at the University, the Marine Sciences Faculty has been organized of faculty from various departments who teach courses and advise students in the marine sciences.

The Marine Institute, located at Sapelo Island, was established in 1953, and has provided facilities and encouragement for basic research in estuarine and salt marsh ecology. From its initial role as a marine biology field station, the Institute has become a multidisciplinary laboratory investigating basic biological, physical, and chemical aspects of the estuarine and shallow marine environment.

The Marine Extension Service provides the mechanics for transfer of information and the proficiency for problem solving related to the State's marine resources. Administrative headquarters are located in the Marine Resources Extension Center on Skidaway Island, with members of the staff located on Skidaway Island, in Brunswick, and in Athens to provide information and assistance to individuals as well as to commercial and State organizations.

The Georgia Sea Grant Program, part of the National Sea Grant Program, was established in Georgia in 1971. In an approach roughly analogous to that of the Land Grant System in working with agriculture, Sea Grant promotes the wise use of marine resources through a program of research, education, and advisory services.

OFFICE OF COMPUTING ACTIVITIES

The Office of Computing Activities has three major computer hardware systems installed and interconnected which service not only The University of Georgia but also the University System of Georgia Network. Four divisions operate within OCA: the Educational and Technical Support Services Division provides a constant interface with all on-campus and remote users in the University System; the Institutional Services Division provides for software development and the production scheduling control and data entry to meet the information needs of the University administration; the Computer Services Division is responsible for system programming and the operation of all computers and associated hardware in the OCA to meet the computing needs of the user communities; the Information Services Division provides literature search services for the research and graduate student staff of the University.

OFFICE OF DEVELOPMENT AND UNIVERSITY RELATIONS

The Vice President for Development and University Relations is responsible for the planning, coordination, and conduct of all programs involving alumni and friends of the University, including institutional public relations and fund raising. The Office of the Vice President embraces three functional units. The Office of Alumni Relations works with the Alumni Society and various school and college groups conducting year-round programs involving alumni and friends throughout the United States. The Development staff is concerned with all aspects of fund-raising for the University and works closely with the various schools and colleges, their alumni constituents and friends. The University of Georgia Foundation, an independent incorporated group created to assist the University, handles endowments and unrestricted funds received from alumni, friends, and corporate donors. The Office of Public Relations is concerned with the gathering and dissemination of information about the University to members of the University community as well as to the various publics of the institution. An Office of Administrative Services supports the work of all offices under the Vice President.

OFFICE OF GENERAL RESEARCH

All non-agricultural research proposals and contracts are reviewed by the Office of General Research. The Office of General Research has the responsibility of overseeing budgets, expenditure accounting, and procedures for several State-funded units and for contracts and grants administered through the office. It also provides help in locating sources of funds and in developing faculty members' research programs.

PUBLIC SAFETY DIVISION

Response to problems of life and property safety is functionally and educationally related to University purposes. Crime prevention and control involve the use of full peace officer authority, service and emergency first aid assistance by the UGA Police Department. Specialized attention to biohazardous materials and agents, radiation and laboratory safety, accident and fire prevention, solid and liquid waste control, pesticide control, food sanitation, as well as other areas of environmental safety are addressed in accordance with guidelines established by laws, rules, and regulations of the State and federal government by the Safety Services Department. The Safety Services Department also conducts safety training classes for faculty, staff, students, and the surrounding community. Vehicle registration and parking control, along with safe vehicle operations, are addressed by the Traffic Safety Department. The Northeast Georgia Police Academy has provided several hundred-thousand student-man-hours of basic recruit training, specialized training, and in-service training for State, municipal, and county law enforcement officers in the northeast Georgia area.

RUSK CENTER FOR INTERNATIONAL AND COMPARATIVE LAW

The Rusk Center was founded in 1977 to facilitate interactions between business and government activities, and between various government activities. The Center works closely with a broad range of business and government entities at the local, state, federal, and international levels to (1) identify specific government-business interactions which affect international trade and investment that involve unnecessary burdens on business or governmental interests; (2) mobilize university, business, and government resources to develop theoretical and practical approaches to substantially reduce such burdens; and (3) facilitate the implementation of such approaches by providing business and government entities with essential informational and manpower resources.

THE UNIVERSITY BUSINESS DEVELOPMENT CENTER

The University Business Development Center was established at the University in 1977 to assist in the improvement of the economic quality of life in Georgia and the Southeast. As one of eight national centers, applied research as well as counseling assistance, small business continuing education programs, technical assistance, and market information will be available to small businesses in the State.

THE UNIVERSITY OF GEORGIA BOTANICAL GARDEN

The Botanical Garden serves the University as an outdoor laboratory for regular and special classes of plant-oriented disciplines at the University, as well as for certain types of research. Several research projects have been completed and others are underway. Research and instructional activities permitted in the Garden are determined under guidelines decided by the Botanical Garden Board of Advisors.

The Botanical Garden Callaway Building is available for biologically oriented conferences, meetings, short courses, and similar events. Short courses and other adult educational activities are also initiated by the staff and associates of the Botanical Garden.

UNIVERSITY OF GEORGIA LIBRARIES

The University of Georgia Libraries include the Main (Ilah Dunlap Little) Memorial Library, the Science (South Branch) Library, the Law Library, the Georgia Center Library, and various lab collections on the UGA campus, with experiment station libraries in Griffin, Tifton, and Skidaway.

The functions of a research library include supporting undergraduate instruction, graduate instruction, professional schools, and faculty research. The usefulness of a research library's collections extends to other educational institutions, and into the practical everyday affairs of commerce, industry, and government across the entire State or region.

UNIVERSITY OF GEORGIA PRESS

The University of Georgia Press was organized in the summer of 1938 with the stated purpose of publishing scholarly books and monographs. Its primary function is to publish the results of research and scholarship for the benefit of scholars and students and to publish readable and authentic interpretations of such material for the educated layman. The Press also publishes works which interpret and preserve the history and culture of the State and region.

THE UNIVERSITY OF GEORGIA RESEARCH PARK

The University of Georgia Research Park is being developed as a center of research and development, service, educational and training facilities for University, State, federal, and private organizations which relate to the teaching, research, and service programs being conducted on campus. The activities of facilities located in the Research Park are related to applied studies in animal and plant pathology, agricultural engineering, bacteriology, botany, entomology, chemistry, pharmacy, physics, psychology, geology, food science, poultry science, forest management, work utilization, water pollution, zoology, ecology, community and area development, research into performance and function of the mentally retarded together with preparation of personnel to work with them, and other areas.

Facilities Located at the Research Park

- Agricultural Research Facilities (UGA)
- Arthritis Research Facility (UGA)
- Botany and Biochemistry Research (UGA)
- Cobalt 60 Irradiation Facility (UGA)
- Georgia Retardation Center, Athens Branch (State)
- Institute of Ecology (UGA)
- Northeast Georgia Area Planning and Development Commission (Regional)
- Poultry Disease Research Center (UGA)
- Psychology Animal Behavior Laboratory (UGA)
- Richard B. Russell Agricultural Research Center (Federal)
- Riverbend Research Laboratories (UGA)
- Soil Testing and Analysis Laboratory (UGA)
- Southeast Environmental Research Laboratory (Federal)
- Southeast Poultry Research Laboratory (Federal)
- Southern Regional Poultry Genetics Laboratory (UGA)

VETERINARY MEDICAL EXPERIMENT STATION

The Veterinary Medical Experiment Station coordinates and conducts research on health problems in food and fiber producing animals, including poultry. The research programs which have applied, basic, and comparative orientation are divided broadly into four main categories: infectious diseases, non-infectious diseases, diagnostic techniques, and therapeutic procedures. Facilities are located within the College of Veterinary Medicine at Athens, in the Poultry Disease Research Center at Athens, and in the Veterinary Diagnostic Assistance Laboratories at Athens and Tifton. Opportunities for graduate training in the biomedical sciences are provided by the Station's research programs. Translation of research accomplishments into services that can aid the livestock industry is an important part of the mission of the Veterinary Medical Experiment Station.
